

Gun Module Exchange

Gun Module Exchange Program...

K2 Engineering Group now offers an exchange program for your existing gun modules. The exchange is a third of the price of a brand new gun module. All consumable parts will be replaced such as solenoids, fittings, o-rings and seals which will bring the module back to a like new condition. For your convenience we have the rebuilt modules in stock for immediate shipment. When you receive the rebuilt modules just send your old ones back to K2.

When is it time to rebuild?

If you are seeing glue dripping from the nozzles or from the module itself it is time to order a rebuilt gun module from K2 Engineering Group. Also if there is glue on the stand it probably means that the gun module is leaking, therefore it is time to order a rebuilt module from K2.

How the program works...

When you notice that it is time to replace your gun modules, all you have to do is order a Gun Module Rebuild from K2 Engineering.

We will send you a newly rebuilt gun module from our stock, when you receive your rebuilt modules simply send your old ones back to us.

It's that simple!

There is a 30 day warranty on the consumable parts replaced by K2 Engineering Group. We will not warranty any parts that we do not provide
